

**The Hand Center at SRO is the only Hand Center in California north of San Francisco that consists of orthopaedic surgeons who have had additional training at the fellowship level** assuring you that our surgeons provide the most up-to-date, medically appropriate treatment. In combination with our certified hand therapist and medical staff, our physicians offer exceptional quality in both surgical and non-surgical evaluation and treatment.

### A Tradition Of Excellence

Santa Rosa Orthopaedic Group (SRO) has set the standard for orthopaedic care and services in the North Bay for more than 60 years. SRO's ten member physician team are fellowship-trained sub-specialists who stay current with treatments, technologies, and procedures in joint replacement, sports medicine, foot and ankle surgery, spine disorders, trauma, and hand and upper extremity treatment.

### Your First Step Toward Better Health

You are invited to schedule an appointment with the Santa Rosa Orthopaedic Medical Group by calling (707) 546-1922. You may request to see a specific physician, or you may choose to be referred to any of our outstanding physicians according to the specific specialty you require.

### The Hand Center at SRO

*The North Bay's  
premier resource  
for Hand and Upper  
Extremity Care*

## Team Effort, Improved Results All In One Location

The Hand Center at SRO affords each patient state-of-the-art medical care in a friendly and compassionate environment. Our team treatment model focuses on diagnostics and meticulous surgical details, in addition to carefully monitored post-surgical rehabilitation and recovery.

The Hand Center's surgeons and certified hand therapist consult together on cases to

assure quality of care and deliver successful results for patients. This personalized collaborative approach enables us to work closely and

efficiently with each patient to achieve the highest level of function and recovery.

## Expertise. Accessibility. Coordinated Care.

The Hand Center at SRO offers a comprehensive array of hand and upper extremity care options, including diagnostic and treatment options for:

- Trauma care
- Work-related injuries
- Sports injuries
- Minimally invasive surgery
- Nerve and tendon conditions
- Arthritis
- Fractures
- Repetitive stress injuries
- Wound care
- Congenital defects
- Amputations

## Experience Offers Advantages

### Kai-Uwe Mazur, M.D.

Dr. Mazur, the Medical Director of the Hand Center at SRO, is a board-certified orthopaedic surgeon with one year of specialized training in hand and upper extremity surgery. Following a certification exam, Dr. Mazur received a Certificate of Added Qualification (CAQ) for Hand and Upper Extremity Surgery from the American Board of Orthopaedic Surgery. He has been elected to the American Society for Surgery of the Hand, and is a Fellow of the American Academy of Orthopedic Surgeons. Dr. Mazur has published articles and several peer-reviewed research papers and presented his findings at national meetings. Dr. Mazur has been in private practice since 1996.

A magna cum laude graduate of Brown University, Dr. Mazur received his medical degree with honors from New York University School of Medicine. He completed his orthopaedic surgery residency at the University of Southern California and pursued further training in hand and upper extremity surgery at the Mayo Clinic in Rochester, Minnesota.

The Hand Center at SRO is led by two respected, highly rated surgeons: Kai-Uwe Mazur, M.D. and Dominic Mintalucci, M.D.

### Dominic J. Mintalucci, M.D.

Dr. Dominic J. Mintalucci is a board-eligible orthopaedic surgeon fellowship trained in hand and upper extremity surgery. His professional memberships include the American Society for Surgery of the Hand and the American Association of Orthopaedic Surgeons. Dr. Mintalucci has published several articles, has presented at national conferences, and is involved in several research projects.

Dr. Mintalucci attended Georgetown University in Washington, DC where he received his Bachelor of Science degree in Biology and continued on to earn his medical degree from their School of Medicine. He completed his orthopaedic surgery residency at Monmouth Medical Center in New Jersey and pursued subspecialty fellowship training in microsurgical, hand and upper extremity surgery at the Rothman Institute & Thomas Jefferson University in Philadelphia, PA.
