

SRO's Innovative Multidisciplinary Team Approach

SRO is a leading destination for total joint replacement surgeries of the hip, knee and shoulder in Northern California. The Program is comprised of five board-certified surgeons specializing in total joint replacement, an on-premise 10,000 square foot state-of-the-art sports medicine and rehabilitation center with veteran physical and occupational therapists, medical assistants and in-house diagnostic imaging. Our unique collaborative approach provides consistency of care, translating into better orthopaedic outcomes for our patients.

invasive surgical techniques and
rehabilitation to help to further
the success of your treatment.*

Take Control of Joint Pain and Get Back to Life!

The Total Joint Replacement Program at SRO brings a comprehensive, more streamlined approach to joint replacement. Our approach focuses on team-oriented care, new surgical technologies, state-of-the-art rehabilitation and patient education to improve the outcome of joint replacement surgery and accelerate your rehabilitation.

SRO surgeons and physical therapists care and pride themselves on getting patients back to the activities they love, helping to re-establish independence and restore livelihoods.

Demand for total joint replacement surgery is expected to grow at an unprecedented rate in the next 25 years. The Total Joint Replacement Program at SRO is a center of excellence that has stepped up to meet this challenge by providing the best orthopaedic care in Northern California with a goal of extending the life cycle of total joint replacements.

Breakthrough Total Joint Replacement Treatment Options

If you suffer from osteoarthritis or suffer from pain in the knee, hip or shoulder, it's time to restore your mobility, regain your independence, and return to doing the things you love the most. The Total Joint Replacement Program at SRO offers the most advanced total joint replacement for hips, knees and shoulders.

When should I consider Total Joint Replacement?

- Pain is not relieved by more conservative methods of treatment, such as medications, by the use of a cane, and by restricting activities or physical therapy
- Functional limitations restrict not only work and recreation, but also the ordinary activities of daily living
- Stiffness in the joint is significant
- X-rays show advanced arthritis or other problems

Meet SRO's Total Joint Replacement Surgeons

SRO's five total joint replacement surgeons come from a variety of professional backgrounds, with prestigious qualifications and awards to their names, as well as fellowship training in total joint replacement, sports medicine, and orthopaedic trauma. SRO surgeons have the experience and combined breadth of knowledge to guarantee you the best possible results for your total joint replacement.
